The Three R's

People pollute the earth. People work to stop pollution.
You can help. Use the Three R's-Reuse, Reduce, and Recycle.

Reuse

jar

reuse jars

containers

reuse
containers

Use jars again. Use containers again.

clothes

clothes to others

Reuse clothes. Give clothes to others.

Reduce

plastic bags

paper bag

reusable bag

Do not use plastic bags. Use a paper bag or buy a bag to use again.

paper towels

cloth napkins

hand dryer

Use less paper towels. Dry hands with cloth napkins or a hand dryer.

Recycle

glass

cans

plastics

newspaper

Put glass, cans, plastics, and newspaper in the recycle bin.

recycle bin

A recycle truck will empty it.

recycle truck

The trash is used to make new things. New glass. New cans. New containers. New paper.

Adapted Text-Intermediate

The Three R's

People use the earth's land, air, and water. People also pollute the earth. People are working to stop pollution. You can help too. Use the Three R's-Reuse, Reduce and Recycle.

Reuse

reuse jars

reuse containers

give clothing
to others

Use items over and over again. Do not throw them away. Reuse containers and jars. Wash and refill them. Give clothing to those who need them.

Reduce

plastic bags

paper bag

reusable bag

Do not use plastic bags when you shop. Use your own reusable bag or use paper bags.

paper towels

cloth napkins

hand dryer

Use less paper towels. Dry your hands with cloth napkins or a hand dryer.

Recycle

plastic containers

recycle bin

recycle truck

Put glass, cans, newspapers, and plastic containers in a recycle bin. A truck will pick up these items at your house. When recycled, they can be used to make new paper, new containers, and new soda cans.

Adapted text-Advanced

The Three R's

For many years, people have used the earth's land, air, and water. People have also polluted the earth with their waste, harmful chemicals, and poisons. People are now working to help protect the earth and stop pollution. You can help too. Start by using the Three R's-Reuse, Reduce, and Recycle.

Reduce

The best way to deal with trash is not to have any! Reducing the amount of trash you have prevents waste from piling up. Reduce your waste by bringing your own bags when you shop or use paper. You can also reduce waste by using fewer paper towels. Use cloth napkins or a hand dryer instead.

cloth napkins

hand dryer

Reuse

Use items you buy over and over again. Do not throw them away. For example, reuse containers and jars and give clothing and items around your house to charity.

Recycle

Every day we use products made from recycled materials. Put your glass, cans, newspapers, milk jugs, and other recyclable materials in a recycle bin. A truck may pick up these items at your house. You can also take them to a recycling station. When recycled, they can be turned into new products like jackets, cars, and soda cans. Recycling saves money, energy, and the environment.
